Describe Access Routes (Existing and proposed, for proposed road construction specify length and width in feet):

Existing access road on the west side of hill, up the draw, lies on exposed bedrock formation and is difficult to maintain, therefore we propose to use the waste material to build a ramp road (8-10 ft wide) off the East side of Bullseye Hill, descending Northward approx 300 ft along hillside to the eastside draw, thence Northward several hundred feet to Joy/Swasey Rd.

List all mechanized earth moving equipment to be used during the operation and state if any explosives are to be utilized. Describe and furnish a map or sketch, when applicable, showing existing surface disturbances, structures, facilities, etc., and the location and size of areas where surface disturbance are proposed, including existing and/or proposed routes of access. Calculate the total acreage proposed for disturbance (1 AC. = 43,560 sq. ft.).

Quarry wonderstone (to produce various decorative rock products, such as bookends, spheres, lamp bases, yard rock, etc) Digging with Backhoe will be principal equipment used. No blasting necessary. Occasionally pavement breaker (compressed air) to be used to loosen formation. The volume of stone removed is anticipated to be in the area of a few hundred tons, at most.
